

## Spring Family Fun: Windowsill Planter Project

### GO GREEN WITH A WINDOWSILL PLANTER BOX!

This spring, we're Serving Up Smiles from the ground up with a fun-filled planter box! It's a great way to bring out your family's crafty side, plus you'll always have plenty of flowers or fresh herbs on hand!

Start out with an empty juice or milk carton. Wash it out and let dry. Then, have an adult use a serrated knife or scissors to cut out the base, so your box is 2-4 inches high. Gather up some paint, markers, construction paper and whatever other art supplies you have laying around, and let the decorating begin! Once your planter is complete, add soil and seeds and place on the windowsill. Everyone can take turns watering, and before you know it, your plants will grow!

If you've planted herbs, use them to add extra flavor to your favorite pierogy recipe. Try sprinkling them on top of our Spring favorites, Garden Medley Pierogy Sauté and Spring Frittata, for a burst of freshness. Or, if flowers are popping up in your planter, make a beautiful centerpiece for the table. Whatever you choose, smiles will be in full bloom!
